Bill to Grant Civil Service Commissioners More Power In Their Examinations. Age of Consent Bill Tabled-Bill to Shut Off the Indians' Whisky-Other Capital News.

WASHINGTON, April 11.-The house yesterday spent the entire day in general debate on the "filled cheese" bill. Today the bill will be read under the 5-minute rule for amendment. A very considerable opposition to the measure has developed and some of the members interested in its passage fear it will fail unless radically amended. The principal objection seems to be raised to the tax features of the bill-\$400 on the manufacturer and \$40 on the retailerwhile there appears general unanimity in favor of a bill to compel the branding of filled cheese. HOUSE NIGHT SESSION.

Mr. McCall Objects to Large Pensions For Officers' Widows.

WASHINGTON, April 11 .- At the night session of the house an attack was made on the pension committee for recommending larger pensions than the law allows to the widows of officers. Mr. Talbert (Dem., S. C.), Mr. Baker (Rep., N. H.), Mr. Hemingway (Rep., Ind.) and Mr. McCall (Rep., Tenn.) all protested against this course. The latter declared that he was willing to attend Friday night sessions if their object was the relief of the poor soldiers who fought in the trenches, but if their purpose was to vote large pensions to officers' widows he would not be present. Mr. Pickler, chairman of the committee, defended the course of the committee, Abner Doubleday, where the committee recommended \$100 a mouth, because of the exceptional circumstances surrounding that case. Discouraging Crop Reports From the Central Western States - Number of Account of Strikes-Exports of Wheat From Both Coasts.

NEW YORK, April 11.—Bradstreet's says: While there is no general increase in business there are several encouraging features. First, the advance in prices of flour, wheat, corn, oats, pork and sugar, together with that for steel billets and beams and other iron and steel products including No. 2 foundry pig and for tinplates. The advance in wheat has continued so much longer than expected that the trade are again discussing the liklihood of this being the beginning of the long advance for cereals which they believe must come after the extreme depression of the past few years. Unfavorable crop reports from central western states, confirmation of previous short crop reports from Argentine and Australia, small supplies in Europe and afloat therefor, but above all a revival of speculative interests in

wheat are underneath cereal prices. Exports of wheat (flour included as wheat) from both coasts of the United States amount to 1,764,000 bushels this week, compared with 1,693,000 last week, 2,934,000 in the week last year, 1,955,005 in the week two years ago and with 2,948,000 in the corresponding week of 1893. Indian corn exports amount to 1,391,000 bushels this week, compared with 2,199,000 last week, and with 814,000 in the week one year ago and 2,040,000 two years ago.

Small Increase In Business and Prices Since April 1.

NEW YORK, April 11 .- R. G. Dun & Co.'s weekly review of trade says: The volume of business has not on the whole increased, nor have prices appreciably advanced since April 1, when the range for all commodities was the lowest ever some other articles have declined and course. the root of the matter is that demand for consumption is still below expectations. The number of hands employed has been slightly lessened by strikes in some establishments and by stoppage or reduction in force in others, but the change during the past week has not been relatively important. The weather has not favored active distribution of spring goods, and uncertainty as to continued employment affects the purchases by hands in a large number of establishments.

THE REPUBLICAN PLATFORM.

? The following plank in the Nationa Republican platform adopted at the convention held at Mionespolis, Minn, in 1892, on the silver question, is good enough for any true American to stand upon, it seems to us:

The American people, from tradition and interest, favor bimetalism, and the Republican party demands the use of both gold and silver as standard money, with such restrictions and legislation, as will secure a maintenance of the parity of values of the two metals, so that the purchasing and the debt-paying power of the dollar, whether of silver, gold or paper, shall e at all times equal. The interests of the producers of the country, its farmers and its workingmen, demand that every dollar, paper or coin, issued by the government shall be as good

any other. We commend the wise and patriotic step already taken by our government to secure an international conference to adopt ne measures as willinsure a parity of value between gold and silver for use as money throughout the world.

A NOBLE FIGHT.

AN EMINENT SOUTHERN LAWYER'S LONG CONFLICT WITH DISEASE.

Twenty-five Years of Prosperity, Adver-sity and Suffering. The Great Vic-tory Won by Science Over a Stubborn Disease.

(From the Atlanta, Ga., Constitution.) Foremost among the best known lawyers and farmers of North Carolina stands Col. and farmers of North Carolina stands Col. Isaac A. Sugg, of Greenville. Mr. Sugg has resided in Greenville 22 years. While nearly everyone in Pitt Co. knows Mr. S'a history, perhaps all do not know of his return to business again after an illness of 16 years. No man has gone through more than he, and lived. It was a case of the entire breaking down of the nervous system, attended by excruciating, agonizing, unendurable pain. Opiates and stimulants only quieted temporarily, and all treatments failed him. Only his love of family and friends prevented suicide. He told a reporter the following interesting story:

"I kept at my work as long as I could but nature gave way at last and I succumbed

but nature gave way at last and I succumbed to the inevitable. My entire nervous sys-tem had been shattered by the stimulants and opiates I had taken, my blood had actu-ally turned to water, my weight had drop-ped from 173 pounds to 123, and it seemed to everybody that the end was in sight. Why I could not bear the gentle hand of my wife to bathe my limbs with tepid water. I was simply living from hour to hour. I had made my will, settled my business and waited for the last strand of life to snap. It was at this time that a somewhat simi-

lar case as my own was brought to my notice. This man had suffered very much as I had, his life had been despaired of as mine had and yet he had been cured. Think what that little word meant to me— CURED. The report stated that the work had been accomplished by a medicine known as Dr. Williams' Pink Pills for Pale People. I investigated the report thoroughly and found that it was true in detail. Then I procured some of Dr. Williams' Pink Pills and began taking them and began Pills and began taking them and began to get better. I began to sleep like a healthful child, sound, calm and peaceful. My appetite came back and, my nerves were soothed and restored to their normal condition and I felt like a new man. But the greatest blessing was the mental improvement. I began to read and digest, to formulate new plans, to take interest in my law practice, which began to come back to me as soon as my clients realized that I was as soon as my clients realized that I was again myself. After a lepse of 10 years I ride horse back every day without fatigue.

"That Dr. Williams' Pink Pills saved my life is beyond doubt, and I am spreading their praise far and wide."

Inquiry about the town of Greenville substantiated the above facts of Col. Sugg's case, and that many others are being benefited by Dr. Williams' Pink Pills, Dr. Williams' Pink Pills,

Aged Illinois Man Says His Relative Have Robbed Him,

OTTAWA, Ills., April 11 .- William Hinckley, an aged man who has been a resident of La Salle county for over 50 years and is now 96, has filed a bill in of Troy Grove, with openly robbing him of \$4,150 Oct 15, 1894. After the death of his second wife, grandmother of Mrs. Moore, in 1893, he states that he lived with his wife's son, James Mc-Laren, in the village of Prairie Center, 10 miles north of Ottawa, for several months. He then went to live with the Moores, who were renters of a farm in Proy Grove. After he han b them about a year, having paid to them all of his income, some \$400, for his board and care, he received \$4,150, principal and interest of a mortgage which he held upon a farm sold to George Ford. He placed the money in what he considered a safe place, but he alleges the Moores secured possession of it and on the following day purchased an 80-acre farm. He demands that the Moores deed him the farm and that James McLaren be compelled to give up possession of his cottage in the village.

FOR A GOLD STANDARD.

Rhode Island Republicans Do Not Favor Free Silver.

PROVIDENCE, R. I., April 11.—The Republican state convention adopted a resolution indorsing; the following, which was passed by the Providence board of trade, April 7:

Whereas, It is important to every business man, producer and wage earner that a stop shall be put to the enormous cost to the government and to all of our people resulting from the continuance of the agitation for the free coinage of silver, which agitation stands in the way of a renewal of confidence and national prosperity, it is Resolved, That the Providence board of trade ask all citizens to urge the selection of delegates to the political conventions of both great parties who will advocate clear and distinct utterances in favor of the maintenance of the present gold standard

The convention also adopted a resolution in favor of international arbitration.

To make money you now must be will ng to spend some. Many seem to think that it is only a new article that needs dvertising but that is a g eat mistake, Let every man advertise his wares; other ers have made fortunes doing it. Nothing is too common to have its sale materially increased by newspaper publicity. Judicious advertising is not only the pest way to make customers, but it is the cheapest as we'l. It gets them and it keeps them for you. There is strong competion now in all lines of business. You need advertising to give you your share of the trade, and you need it done in the most skillful and intelligent way The best advertising medium in this neck of the woods is THE REPUBLICAN .

## Old People.

O'd people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whiskey nor other intoxicant, but acts as a tonic and alterative. It acts mildly on the stomach and bowels, adding strength and giving tone to the organs, thereby aiding Nature in the performance of the functions. Do You Know that in most countries druggists are not permitted to sell narcotics without labelling them poisons?

Do You Know that you should not permit any medicine to be given your child unless you or your physician know of what it is composed?

Do You Know that Castoria is a purely vegetable preparation, and that a list of its ingredients is published with every bottle?

Do You Know that Castoria is the prescription of the famous Dr. SAMUEL PITCHER. That it has been in use for nearly thirty years, and that more Castoria is wow sold than of all other remedies for children combined?

Do You Know that the Patent Office Department of the United States, and of other countries, have issued exclusive right to Dr. Pitcher and his assigns to use the word "Castoria" and its formula, and that to imitate them is a state prison offense?

Do You Know that one of the reasons for granting this government-protection was because Castoria had been preven to be absolutely harmless?

Do You Know that 35 average coses of Castoria are furnished for 35 cents, or one cent a dose?

Do You Know that when possessed of this perfect preparation, your children will be kept well, and that you will have unbroken rest?

This will be the star attraction from the description of it. The haunted swing will be there, and so will the mirror maze. The great electric tower now being taken apart in the park will be set up in the Sutro midway. Near it will be the Firth wheel, the camera obscura and other marvels. A Venetian canal, in which boats will run, is also to be constructed. This will be 800 feet long and 12 feet wide. A Face In Her Thigh.

The most remarkable human monstrosity that ever saw the light of day upon the American continent is little Estanislao Arichi, a 7-year-old Mexican girl, who resides with her foster parents near the little village of Morelia, in the state of Aguascallentas. The first that was known of the existence of this rarest of all human beings was when a Mexican paper made the following brief

The King of Korea.

Wouldn't you like to be king of Korea just now? Next to the king of the Cannibal islands, who may at any time be served up as a ragout or in the shape of a broil or a roast, the Korean potentate occupies an enviable position. Since the assassination of the queen he is in daily fear of his life. He is afraid to eat anything unless it has been specially prepared by the wife of the American missionary doctor, Mrs. Underwood. His loving subjects might drop something into his soup, so his meals are sent to him in a locked box, one key of which Mrs. Underwood has, while he has the other. If any one could pick that lock, the cry would be heard in the streets: "The king is dead! Long live the king!" What a charming life to lead! What a happy man that king must bealmost as happy as the New York tramp, who can quietly freeze to death because they won't let him sleep in the station

house. - New York Herald. Perilons Times In Germany. According to a correspondent in Berlin, English residents in Germany have found it specially necessary of late to be guarded in their remarks about political events when in public places. He states that, to his knowledge, one Englishman was haled off to the police court for an alleged indiscreet reference to the emperor, uttered while about to sit down to dinner, and had to pay a fine of 10 marks by way of hors d'œuvre. A story, which is, no doubt, ben troyato, was then being told in the English clubs. An Englishman was taxed by a German police officer with publicly using an uncomplimentary epithet with regard to the emperor, "You are quite mistaken, I assure you," said the Englishman;"I was talking of the emperor of China! 'Nein; das geht nicht," retorted the official-"there is only one emperor who is-well, who does such things.'

Pwellings In New Jersey. The last state census shows that there are 279,755 dwelling houses in the state of New Jersey. Essex county heads the list of counties, with a total of 43,676, our nearest competitor being Hudson county, with \$7,545 dwellings, and Camden coming third, with 20,909. In dwelling houses alone, Essex county makes a better showing than eight counties combined. These are counties in which there are few factories, whereas Essex is a perfect hive of factories. The smallest number of dwellings in a county is in Cape May, which has 3,367 dwellings. Newark contains 27,633 dwellings. In Jersey City there are \$1,2 179 dwellings. NARROW ESCAPES FROM WATER-SPOUTS IN MEXICO.

A Traveler Relates Two Experiences He Had With These Twisting Terrors-A Congregation of Them, Each of Which

The narrowest escape I ever had was from a congregation of waterspouts. I was making a trip to some of the small miles from Cuba, a spot famous for its story: waterspouts, and in the summer months there were few days that one or more were not seen. Generally a long, attennated black cloud would appear, from which would drop a pendulous cloud. Lower it would descend, resembling the no worry about getting out of a job with lower portion of a balloon, and when Uncle Sam. During the first and second about half way to the water a corresponding figure would be seen rising to meet it. Finally the two would join, year he gets \$14, the fourth \$15 and the and the column, from 400 to 1,000 feet high, more or less, would move away before the wind, bending before it like a gigantic bow-a thing of terror, a frightful object of the sea.

I had been visiting an island about ten miles from our camp and was in a heavy sailboat-too heavy to manipulate by oars readily. When half way home, on the edge of the channel, the wind died completely away, and I noticed all about us a number of strange black clouds

Watching them closely and commenting upon them to my man, I suddenly saw the ominous dropping of a pointed index finger not a sixteenth of a mile away. As I mentioned it my companion pointed behind me to another, and in less than five minutes five of these dread objects dropped from the clouds about

There was not a breath of air, and there was an ominous silence. Even the ever present gulls seemed to have deserted the place. We got out the oars and endeavored to pull, but the boat was too heavy, and we were compelled to await developments.

The cloud tips slowly dropped, and all about us mysterious columns rose up to meet them, until in a few minutes we were surrounded by these huge pillars, so that in one direction the heavens appeared to be supported upon these watery columns. A more remarkwhen they began to move we gave our selves up for lost, as two appeared to be bearing down upon us.

As good luck would have it, they seemed to bring a breeze, and we were able to get under way, and, fortunately, escaped. The two giants came careering down upon us-a spectacle to demoralize the stout hearted. One passed not 206 feet away, rushing on with a noise like that of a steam engine. I could distinctly see the terrific twisting and whirling motion of the water, and for large area about it there was what appeared to be a heavy rain.

The spouts began to move as soon as they were complete, and very soon assumed the bend or bow shape that characterizes them, and went sailing away. venture to estimate their height. they certainly looked it; but they were under 1,000 feet.

My nearest approach to a waterspout occurred later, and dissipated some of was that a spout was broken when touched or interfered with in any way, yet I saw this water giant cross an is-

I was lying in the sands near our camp one day when a lofty spout came into view from the south. It was headsafe, as there was a large reef and long canal key between us. On came the column, passing the reef in safety, a grand spectacle, and every one in the island was seen watching it as it moved rapidly up the lagoon, its upper portions apparently lost in the clouds. If it had continued it would have passed between the two islands, and so reached the open sea, but for some reason its course was changed, and in a few moments it struck the island at an angle. We fully expected to see the whole mass drop, but it kept plowing up the sand, and soon! struck a good sized schooner that had been hauled on the beach, whirling it be is sick and draws handsome wages about end for end like a feather. Then, to our consternation, the spout headed for our island, and with a great bow or curve rushed on.

The distance from island to island was a good rifleshot, and there was not much time to debate, as the spout was now half way across. Seeing that it was veering off and would probably not south, and in a few moments struck our shoal with a roar like that of a locomo-

As I looked up the top seemed a great canopy of water lost in the black clouds, down from which poured great drops which soon drenched me through. The center of the great curve I could not see at all for some singular reason, while the lower end or portion, now but 100 yards away, was rushing by me, a magnificent column of water, boiling and hissing like some living thing. I literally raced with it for the length of the wall, 600 or 800 feet, and had all I could do to keep pace with it.

The water of the shoal was but a few feet deep, and I found later that it cut a deep trench in it as it went along, the coral sand and mud looking as though a dredger had been at work. How long a spout can travel over the land I do not know, but not long. The bay over which this one passed was not over 800 feet at that place. The spout passed us, beating us in the race, and soon disappeared among the dark clouds on the horizon. As common as were these phenomena in this region, I never heard of asualty, though from the above it will be seen that narrow escapes were not rare.—Cor. San Francisco Call.

HOW MARINES OF THE UNITED STATES ARE CARED FOR.

They Are Better Clothed and Fed Than Many Mechanics on Land-One of Them Tells a Reporter All About Their Surroundings and Treatment.

A marine was asked by a reporter to give an account of what he received in the service of Uncle Sam and how he and his fellows enjoyed themselves on islands in the gulf of Mexico, about 50 board ship. The following was his

"The government engages marines for a period of five years. At the end of that time the marine may quit the service or he may re-enlist. There is no doubt of his being able to continue in the service if he does his work honestly. There is years of the marine's service he gets in money, paid monthly, \$13. The third sixth \$16. If at the expiration of his first five years' service he re-enlists, he gets \$18 a month, and if he enlists for a third period of five years he gets \$19 a month in money. "That is the cash part of it, but that

is not half of what a man in the service gets. The government clothes its men besides, and in very good style. It gives a marine a black helmet and a white one. These two are supposed to last for the period of enlistment, which is five years. There is no trouble about wearing them that length of time, as they are not often used. The marine also gets one undress cap a year, which is all he needs. He also gets a storm cap each year. That makes 12 articles of head gear which the government supplies him with in the course of five years, and experience shows that that is quite sufficient. It is nearly three hats a year, and there are not many workingmen who buy as many as that.

"The marine also gets one full dress coat, which, as it is not frequently used. lasts five years very nicely. He receives a fatigue jacket each year and an overcoat. He gets eight pairs of blue tronsers and eight pairs of linen ones in five years, and experience shows that if a man is careful he does not need that Colony, many. He is also supplied with 30 pairs of gloves for the five years. He gets two flannel overshirts each year. He also has two undershirts and two pairs of able sight cannot be imagined, and drawers each year. He also receives four pairs of woolen socks and four pairs of cotton socks each year. He is supplied with three pairs of shoes each year and one pair of arctic shoes each season. He receives two pairs of blankets during the term of service. He is also given 40 linen collars and three pairs of suspenders during the same time. That is the outfit in the way of clothing which the government gives each marine who joins the service. These articles are all of first class material, too, and very serviceable. There is no stint at all. There are a few articles, like neckties and handkerchiefs, which the marine must buy for himself.

"If a man is careful and economical with his clothing, he can save fully one-half of the allowance which he gets, These giants were so tall that I could and if he saves any part of it he is allowed so much money for the clothing My companion said a mile high, and he does not take. There are men in the service today who are taking only about one half of what the government allows, and at the end of their five years' service they will be paid in money for the theories I had concerning them. One the clothes they did not take. The full value of the clothing allowed to each man for five years is \$198,

"The sleeping accommodations of the men are very good. While on shore duty they live in houses and have beds, but while on shipboard they sleep in hammocks which the government furing directly for us, but we felt perfectly nishes. The sleeping quarters, both on land and at sea, are clean and well ventilated. The food is all that a man peeds. Sometimes the commissary is not well administered, and the men complain, but they can soon get a change if they take their complaints to the proper officer. The food is very good and of sufficient variety for any one.

"The men on shipboard also get all they need free, and medical attendance costs them nothing.

"Now this is the pay a man gets as a marine in the navy. He is well clothed and well fed. He sleeps in a good bed in cash every month,

"His work is not at all burdensome. He has enough drill to keep him in the best physical condition and give his appetite a keen edge. He has lots of time for amusement. On shore he can play billiards and pool free at the post, and he may enjoy all kinds of exercise in the gymnasium. The men play baseball, reach us, I ran out on to a sea wall and handball, football. They put the hamwatched it. It gradually drifted to the mer and shot and enjoy themselves just as much as the college boys do. The government also has at each post and on shipboard a library and a reading room, where the men may entertain themselves with books and papers.

"Out of their wages the men must pay their barber and laundry bills, which together amount to about \$2 a month.

"Besides this the marine is taken care of in his old age. If his life has been honorable, at the end of 20 years' service he may retire to the Mariners' home. where he will have a room to himself, a good table, three suits of clothes a year, tobacco free and \$2 a month. If he does not retire until after he has served 80 years, he then gets three-quarters pay and three-quarters of all allowances of clothing, besides a good home and good board, for the rest of his

"It will be seen that Uncle Sam is not niggardly in dealing with his men. If they do their duty, they receive good treatment, and are well fed and clothed, and draw, all things considered, very fair pay."—New York Telegram.

# Where Disease Is Bred.

When a sewer is elogged or choked up the accumulations poison the atmosphere in its vicinity and bring about the conditions that breed tisease. We all know that in time of pestilence every precaution is taken, not only to keep the sewers free and open, but even to remove all decaying open, but even to remove all decaying. matter from the community. The danger of infection is thus minimized. How tew of us who pay taxes for the maintenance of sanitary bulezus for the public health think of an equal requirement for our individual welfare. The alimentary canal is the great sewer of the human system. When that is dammed up conditions are generated which invite fevers and such diseases as our nature inclines to. Constipation is a clogging of the natural drains, and nearly everything we suffer from follows this condition. It will not do merely to clear the drains from time to time. We must repair and improve the working power of the machinery whose function it is to perform this work. Smith's Bile Beans differ from pills in that they are more than a mere cathartic. They not only stimulate sluggish bowels and clear the system of all disease breeding matter, but they remedy the evil complained of; they restore power and freedom of operation to the secreting organs, and they tone up and strengthen the entire system. They are easy and soothing in action. Try them. 25 cts. a bottle, 5 bottles, \$1.00. For sale by druggists and medicine dealers throughout the country, or by mall, postpaid, on receipt of price.
